PROFILE

Computer Science student at Cairo University with hands-on experience in Python, C++, Java, SQL, web development, networking, and cybersecurity. Experienced in developing academic projects using Django, Flask, databases, and network configuration. Interested in AI, cybersecurity, and software engineering internships.

EDUCATION

B.Sc. in Artificial Intelligence

Cairo University - Faculty of Computers and Artificial Intelligence

Expected Graduation: July 2028

TECHNICAL & PROFESSIONAL SKILLS

- **Programming Languages:** C++, Python, Java, JavaScript, CSS
- **Software Development:** Object-Oriented Programming (OOP), Data Structures & Algorithms, SOLID Principles & Design Patterns
- **Databases & SQL:** SQL, Relational Database concepts, JOINS, Subqueries, GROUP BY, HAVING, Aggregate Functions
- **Cybersecurity & Networking:** Networking Fundamentals, Ethical Hacking, Penetration Testing Fundamentals, TCP/IP, HTTP, DNS, Sockets
- **AI & Data Science:** Python for Data Science, Machine Learning Fundamentals, Generative AI, Prompt Engineering
- **Tools & Technologies:** Git, GitHub, VS Code, Microsoft Excel
- **Languages:** Arabic (Native), English (Good command)

CERTIFICATIONS & TRAINING

- **CyberOps Associate** — Cisco Networking Academy, offered by National Telecommunication Institute (NTI) | Aug 2026
- **Network Security Training** — National Telecommunication Institute (NTI) / ITIDA | Jul 2026 | 120 Hours | Score: 95.5%
- **Generative AI Program** — CIB Summer Internship | 2026
- **Microsoft Machine Learning Engineer Track** — DEPI / MCIT | 2026

PROJECTS & EXPERIENCE

- **Library Management System (Django / Python / SQL)**
Developed a full-stack library management system using Django, Python, and SQL. Implemented database integration and web-based functionality to manage books, users, and library operations as part of a team project.
- **Gym Management System (Python / Flask / SQL)**
Built a web-based gym management system using Python and Flask with database integration. Implemented core management functionality and CRUD operations for organizing gym data and operations.
- **Network Configuration & VLAN Project (Networking)**
Designed and configured a network connecting multiple devices with VLAN segmentation, DHCP server configuration, and Access Control Lists (ACLs) for network traffic management and access control.
- **Competitive Programming & Problem Solving**
Regularly solve algorithmic and problem-solving challenges on Codeforces, focusing on Data Structures, Algorithms, Dynamic Programming, and logical problem solving.
